

BDR SEMINAR in Kobe

"CDB SEMINAR" and "QBiC SEMINAR" have been renamed "BDR SEMINAR".

Henry Kennedy

Stem Cell & Brain Research Institute, Lyon, France

Thursday, November 8, 2018

16:00-17:00, Large Conference Room, MI R&D Center Building 2F

The Spatially Embedded Brain

Summary

The talk will be with insights gained from a predictive large-scale model of the inter-areal network based on consistent, directed and weighted tract-tracing data. The predictive model shows important departures from those based on binary and non-consistent data. Main emphasis will be on the macaque but some coverage of how primate and rodent brains differ will be included.

RIKEN Center for Biosystems Dynamics Research (BDR)

Host: Takuya Hayashi
Brain Connectomics Imaging, BDR
