

# Technical Introduction Seminarのご案内 - Micro/Nano Device Fabrication Service -

理化学研究所 生命機能科学研究センター  
(BDR) 集積バイオデバイス研究チームが  
提供しております微細加工デバイス受託  
サービスについてご紹介いたします。是非  
多数のご参加をお待ちいたしております。

説明者：田中陽チームリーダー  
理化学研究所 生命機能科学研究センター  
集積デバイス研究チーム

The seminar will be held in Japanese, but will use  
presentation slides in English. Questions in English  
are welcome.

- 日時： 2021年3月5日 (金) 11:00-12:30
- 形式： Zoomによるオンライン形式 (定員300名)  
※URLは参加登録者にご案内いたします。
- 言語： 日本語 (スライドは英語表記)
- 対象者： 理研内外の研究者、学生、他
- 参加費： 無料
- 参加登録フォーム： <https://krs1.riken.jp/m?f=1625>
- 締め切り： 2021年3月3日 (水)

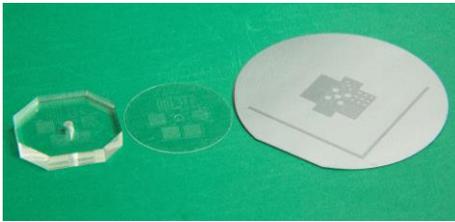

※BDR所属者は登録不要、前日にZoomのURLをお送りします。

- 
- Date: Friday, March 5, 2021
  - Time: 11:00-12:30
  - Place: Online seminar by Zoom  
\* URL will be informed to registered participants.
  - Language: Japanese.  
\* Presentation slides will be in English. Questions in English  
are welcome.
  - Participation Fee: FREE
  - Registration Form: <https://krs1.riken.jp/m?f=1625>
  - Deadline: Wednesday, March 3, 2021

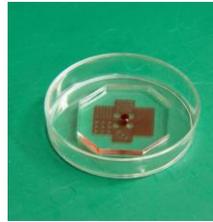

\* BDR members DO NOT need to register.  
You will be notified of the Zoom URL the day before the event.

## SU-8 · PDMS microdevices

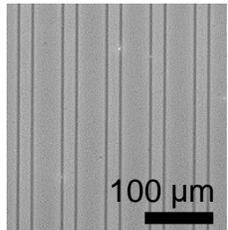

Device example  
(PDMS, Gel, Silicon mold)

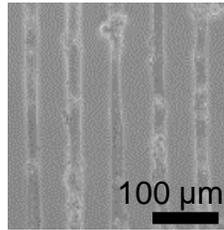

Gel, cell patterning  
device

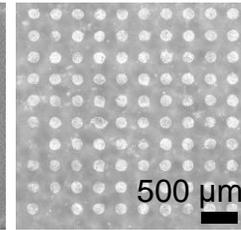

- Customized small channels and chambers are available, made by photolithography
- These small structures can be made on various materials; glass, plastics, elastomers, etc.
- Possible applications:
  - Micro patterning & analysis of biomolecules
  - Long-term cell patterning
  - Single cell/colony analysis

Gel micropattern

Cell micropattern

etc.

## Ultra-small fabrication (under 10 μm)

E. coli analysis device

- Sub-micron features are available, made by electron-beam lithography
- Applications:
  - Ultra-rapid analysis of single molecules in nanochannels
  - Multi-microorganism analysis

D. Priest et al., *Sci. Rep.* 7, 17750 (2017)

etc.

## Glass chip devices

Glass chip example

- Durable for extremely-high pressure both external & internal (~ 50 MPa) and high temperature (~ 500° C)
- Compatible with optical measurement (e.g. laser), acoustic operation, and organic chemicals
- Adaptable jigs are available.
- Applications:
  - Ultra-high flow rate fluid operation
  - High throughput analysis & sorting
