

a seminar series:

Relations between scientists with journals and editors

# BDR SEMINAR via Zoom

## Spyros Goulas

Editor of Developmental Cell

**Thursday, July 29, 2021**

11:00-12:00

Meeting URL will be announced on the event day by e-mail.

✂This seminar is open only to BDR members.

## Insider tips for getting published from an editor

### Summary

From writing a presubmission inquiry or cover letter to a point-by-point response to reviewers or rebuttal letter, for many scientists, irrespective of which stage in their career, publishing papers can be a long and challenging process. Yet, each step on the way will ultimately determine whether a paper will be accepted or rejected at a journal. Although some researchers may be familiar with the editorial process, through direct interactions with their handling editor, for many, it still remains a black box. In my talk, I plan to unravel the mysteries of scientific publishing by shedding light to the editorial process. I will also be sharing editorial insights into current trends and tips on how to prepare manuscripts and increase the chances of successfully publishing papers.

RIKEN Center for Biosystems Dynamics Research (BDR)

**Host: Mitsuru Morimoto**

Lung Development and Regeneration, BDR
