

SSBD is an open public integrated database of microscopy images and quantitative data of biological dynamics. SSBD uses OMERO to manage microscopy images.

OMERO Open Workshop in Kobe 2018

Thursday 25th October 2018 13:00~17:00

Call for Participation

OMERO is a free open source client-server software for managing, visualizing and analyzing microscopy images & associated metadata.

We are very glad to have Prof Jason Swedlow and his team from the University of Dundee, UK to come to present at this workshop. You will learn how to use the OMERO software to visualize and analyze microscopy images through a hands-on tutorial. For more details and registration, please visit the web site below for more information.

<http://ssbd.qbic.riken.jp/event/omero2018>

No prior knowledge in microscopy, scripting and data analysis is required. Any student / researcher dealing with scientific images is more than welcome to join this workshop.

Date/time : Thursday 25th October 2018 13:00 ~ 17:00
Venue : RIKEN Integrated Innovation Building (IIB) 8F, Kobe
Language : English
Fee : Free
